Abstract

One of the task should be done by doctors is community service. Because of many factors such as a number of doctors are increasing, they are becoming more competitive than others. In deed, some doctors have another aim to be a wealthy person. This research is a qualitative research. This research aims to give a comparison physician system in Indonesia with other developed countries, to give a broader knowledge of entrepreneurship in a doctor world in Indonesia, and the application of government policy to help poor inhabitants in order to get free service of health. Joko Widodo, as a President of Indonesia Republic brings a new policy which is BPJS. Nevertheless, in some region, some doctors do not agree with this policy, formerly. It needs planning, organizing, actuating, and proper controlling to keep this policy works in well condition.

Keywords: Doctors, Entrepreneurship, Implementation.
