

## ABSTRAK

Penelitian ini bertujuan untuk mengetahui hubungan antara persepsi *neglectful behavior* orang tua dengan *psychological well-being* pada remaja awal di SMP X Surabaya. Hipotesis pada penelitian ini menyatakan terdapat hubungan negatif antara persepsi *neglectful behavior* orang tua dengan *psychological well-being* pada remaja awal. Penelitian ini dilakukan menggunakan metode kuantitatif dengan desain korelasional. Jumlah subjek dalam penelitian ini adalah 108 siswa SMP X Surabaya, yang diperoleh dengan teknik *sampling* jenuh. Penelitian ini menggunakan skala *psychological well-being* dari Abbott (2009), dan *neglectful behavior* dari Strauss, Kinard & Williams (1997). Reliabilitas skala *psychological well-being* dalam penelitian ini adalah  $\alpha = 0,895$ , dan reliabilitas skala *neglectful behavior* adalah 0,897. Analisis data pada penelitian ini dilakukan dengan uji korelasi pada hipotesis mayor, yang menunjukkan terdapat hubungan yang signifikan antara persepsi *neglectful behavior* orang tua dengan *psychological well-being* pada remaja awal ( $r = -0,354$ ;  $p < 0,05$ ). Uji korelasi pada hipotesis minor 1 menunjukkan terdapat hubungan yang signifikan antara dimensi *emotional needs* dengan *psychological well-being* pada remaja awal ( $r = -0,443$ ;  $p < 0,05$ ), pada hipotesis minor 2 menunjukkan terdapat hubungan yang signifikan antara dimensi *cognitive needs* dengan *psychological well-being* pada remaja awal ( $r = -0,350$ ;  $p < 0,05$ ), pada hipotesis minor 3 menunjukkan tidak terdapat hubungan antara dimensi *supervision needs* dengan *psychological well-being* pada remaja awal ( $r = -0,146$ ;  $p > 0,05$ ), dan pada hipotesis minor 4 menunjukkan tidak terdapat hubungan antara dimensi *physical needs* dengan *psychological well-being* pada remaja awal ( $r = -0,169$ ;  $p > 0,80$ ). Kesimpulan pada penelitian ini adalah *neglectful behavior* orang tua berhubungan secara signifikan dengan *psychological well-being* pada remaja awal.

**Kata kunci:** *neglectful behavior*, *psychological well-being*, remaja awal, orang tua.

## **ABSTRACT**

*The aim of this study is to determine the correlation between perception of parents' neglectful behavior and psychological well-being in early adolescents in SMP X Surabaya. The hypothesis of this study is there is a negative correlation between the perception of neglectful behavior of parents and psychological well-being in early adolescents. This study was conducted using quantitative methods with a correlational design. The number of subjects in this study were 108 students of SMP X Surabaya, which were obtained by saturation sampling technique. This study uses a psychological well-being scale from Abbott (2009), and a neglectful behavior from Straus, Kinard & Williams (1997). The reliability of the psychological well-being scale in this study was  $\alpha = 0.895$ , and the reliability of the neglectful behavior scale was 0.897. Data analysis in this study was carried out by using the correlation test on the major hypothesis, which showed that there was a significant relationship between the neglectful behavior of parents and psychological well-being in early adolescents ( $r = -0.354$ ;  $p < 0.05$ ). The correlation test on the minor hypothesis 1 shows that there is a significant relationship between emotional needs and psychological well-being in early adolescents ( $r = -0.443$ ;  $p < 0.05$ ), the minor hypothesis 2 shows that there is a significant relationship between cognitive needs and psychological well-being in early adolescents ( $r = -0.350$ ;  $p < 0.05$ ), the minor hypothesis 3 shows that there is no relationship between supervision needs and psychological well-being in early adolescents ( $r = -0.146$ ;  $p > 0.05$ ), and the minor hypothesis 4 shows that there is no relationship between physical needs and psychological well-being in early adolescents ( $r = -0.169$ ;  $p > 0.80$ ). The conclusion of this study is that parental neglectful behavior has a significant relationship with psychological well-being in early adolescence.*

**Keyword:** *neglectful behavior, psychological well-being, early adolescent, parents.*
