Steak House Tunes Resto in Surabaya

Following the advances of the world, Indonesia continues to experience growth in the economy. The construction of development was centered in big cities of Indonesia. One of the big cities at the center of development is Surabaya. In the development of this economy, become a great opportunity for people to compete and contribute in the economic development of Surabaya, starting from small to large scale. One of them is food business which is a primary human need to survive alive, as well as a lifestyle that is very popular today. Tunes Resto is a restaurant located in the area of Puri Matahari Apartement, in Jl HR. Muhammad, this includes commercial area that close to the housing, apartments, and also the center of economic growth in the area of West Surabaya. Tunes Resto is steakhouse restaurant, which has the value in interior design, with indoor landscape applications which are the advantages offered by the author.

In the process of designing Tunes Resto, the writer use the concept of Garden House, to present the impression of comfortable outdoor in indoor area, trough the choice of plants and plant function in reducing pollution on the surrounding environment

Keywords: steakhouse, restaurant, garden, house, interior
