

## ABSTRACT

### IMPLEMENTATION OF INFORMATION SYSTEM WITH ACCURATE SOFTWARE ON UD. SUBUR JAYA

*Technology is very important in today's modern area. With the existence of a technology system, people easily do a job. UD. Subur Jaya is a distributor engaged in animal feed. This distributor has been established for over 18 years, but the recording system is still done manually. Therefore, Accounting Information System is very important to be implemented in this company because it can help to overcome the problem of recording data or financial reports, and hopefully the Accurate software implementation is able to increase sales of animal feed so it can compete with other distributors. Accurate Software has several moduls that will be used in UD. Subur Jaya namely Purchase Module (Purchase Module), Sales Module (Sales Module), and Inventory Module (Inventory Module). Having no workflow causing UD. Subur Jaya eager to have a proper Standard Operating Procedure (SOP) in order to organize business process in the company. Methodologies used are Analysis of The Needs of Company, Installation Accurate Software, Making the User Documentation, User Training, and Results Evaluation. The end result of this research is Accurate software can run well in UD. Subur Jaya. In addition, the Accurate software can meet the needs of UD. Subur Jaya, as they can see the history of accounts payable and accounts receivable transactions and see the history of the goods movement.*
